### REMORDS

Philippe Gutton Méduse, si belle

#### GERARD BONNET LE REMORDS. DE L'AUTO-ANALYSE DE FREUD A LA CLINIQUE DES ADOLESCENTS

L'auteur s'appuie sur un précédent ouvrage relatant la place du remords dans l'analyse d'un adolescent devenu meurtrier pour relire et réinterpréter la place de cet affect dans les textes où Freud témoigne de son auto-analyse. Il en dégage une théorie implicite, qui rejoint la théorie explicite, à peine ébauchée, et il souligne en particulier la face active et positive de cet affect présenté le plus souvent comme un handicap. Il montre ensuite les différents visages que prend le remords dans la clinique de l'adolescent en partant des principales caractéristiques qui se sont dégagées des analyses précédentes, de façon à en faciliter le repérage, la prise en compte et l'évolution. Cette étude veut aussi contribuer à mieux différencier les affects majeurs et à montrer comment se positionner quand l'un d'entre eux apparaît central et dominant, qu'il s'agisse de la honte, de la culpabilité, de la tristesse ou du remords.

Mots clés Acte, Affect, Ambivalence, Auto-analyse, Pulsion de voir, Remords

#### YVON BRES LE PECHE SAUVEUR

À une civilisation marquée par le christianisme qui affirmait que tout homme est pécheur et développait en chacun de ses membres une conscience du péché, risque d'en succéder une dans laquelle le remords pourrait, d'une part, à force d'être rejeté, ronger de façon clandestine le psychisme d'individus qui se croient affranchis de toute culpabilité, et, d'autre part, être sans cesse projeté sur autrui dans une poursuite irrationnelle de vengeance plutôt que de justice. Le monde moderne, devenu étranger aux dimensions théologiques et métaphysiques du péché, pourra-t-il trouver une voie permettant de dépasser cet usage aberrant du remords : rien pour moi, tout pour autrui ?

Mots clés Remords, Histoire du concept.

#### MAURICE DESPINOY REMORDS ET REPARATION CHEZ L'ADOLESCENT

La sélection d'un élément psychique unique – défense, pulsion affect – est une démarche de recherche qui contraste avec la position habituelle du clinicien. L'adolescent affronte le bouleversement pubertaire en utilisant les mécanismes schizo-paranoïdes. Sous l'effet des identifications antérieures et de l'idéal du moi, la position dépressive reprend parfois le dessus et suscite des remords. Mais souvent le besoin de l'autre l'emporte sur la préoccupation

Mots clés Affects, Position schizo-paranoïde, Position dépressive, Valeur.

#### GERARD PIRLOT LE PLAISIR COUPABLE DU REMORDS ... OU CELUI DES DENTS MORDANT L'ŒIL DE L'INCONSCIENT

Si, chez le patient nommé " Didier " décrit par Bonnet, il fallut tout un travail psychotérapique pour, une fois consolidées les assises narcissiques, voir apparaître le remords point de départ à un véritable travail psychanalytique, il peut en aller différemment chez le patient névrosé. Le remords, parfois d'emblée là, témoigne en effet d'un trop grand attachement à l'imaginaire maternelle ce qui limite alors toute possibilité d'une culpabilité subjectivement assumée. Ainsi, à partir d'une vignette clinique d'un sujet en analyse, après avoir

rapproché le remords du reproche et avoir évoqué le lien entre remords et auto-sadisme (sadisme narcissique), l'auteur suivant en cela les différentes étymologies française et allemande du terme de " remords ", tente de définir métapsychologiquement ce que ce terme recouvre. L'économie pulsionnelle du remords se découvre être celle mettant en jeu un sadisme oral mêlé aux pulsions scopique et d'emprise, sa dynamique est celle d'un conflit de forces psychiques pouvant aller de la perception hallucinatoire (cf. le cauchemar) à la somatisation (vertige, " état-second ", etc.) ou le passage à l'acte, et enfin sa topique est celle d'un clivage du Moi devant la toute-puissance castratrice d'un Surmoi maternel et totémique (loi du talion). Dans la régression sadique-orale (cannibalique) qui le caractérise, le remords est une forme de retour du fonctionnement psychique dans la " cavité primitive " décrite par Spitz qui sert alors de " contenant " au Self du Moi (les assises narcissiques de celui-ci). Le sujet en proie au remords, tel Caïn, ou Œdipe à Colonne, " écrasé " (subjectivement) d'une culpabilité qui menace la cohésion du Self de son Moi, peut régresser solitairement dans le remords jusqu'à " re-mordre " répétitivement ce Moi par le biais d'un Surmoi maternel " incisif " et castrateur. La prise en charge psychothérapique et analytique du remords visera, par la parole, à " transférer ", sur le psychanalyste la culpabilité sous-jacente à ce remords afin de dégager celle-ci de cette gangue " auto-sadique " et auto-érotique qu'est le remords.

Mots clés Remords, Auto-sadisme, Sadisme oral, Surmoi, Cavité primitive, Self, Enveloppe psychique.

#### FRANÇOIS RICHARD UN REMORDS DE PROUST. CONTRIBUTION A LA THEORIE PSYCHANALYTIQUE DE LA CREATION

Dans cet article est faite l'hypothèse que l'on trouve dans l'ensemble de À la recherche du temps perdu de Marcel Proust les traces d'une censure portant sur l'émergence de la sexualité pubertaire. Explicitement évoqué dans Contre Sainte-Beuve, le moment de découverte de la nouveauté pubertaire ne réapparaît ensuite que de façon voilée dans La Recherche. De cette censure et de ce remords, l'œuvre cherche à en réparer les effets destructeurs par une esthétique spécifique dont l'économie libidinale est ici analysée (en particulier le fantasme d'" homme-lesbien ", un certain fétichisme, et la métaphorisation permanente de l'angoisse de castration). Un regard nouveau peut alors être porté sur les apories proustiennes bien connues concernant la temporalité.

Mots clés Censure, Création littéraire, Marcel Proust, Puberté, Temporalité

#### MAHOMMED HAM DE L'ERRANCE A L'EXIL OU LE PARADIGME D'UNE LANGUE DE TRANSFERT

À travers une confrontation clinique, l'auteur montre comment l'écoute se trouve malmenée par l'insistance du récit événementiel ; et où justement l'impasse transféro-transférentielle se constitue comme sentiment de remords. Son analyse déploie aussi une heuristique inspirée par leur langue de rencontre et leur langue première, l'arabe. Cette dernière de par sa structuration particulière autorise quelques mots à se constituer en concepts métapsychologiques et en même temps comme reste langagier qui ouvre à une lecture du trauma dont la sortie est inscrite du côté de l'élaboration de la lettre.

Mots clés Angoisse, Exil, Langue maternelle, Plainte, Transfert /contre -transfert, Trauma.

#### STEPHANIE FREMONT ACTE SEXUEL VIOLENT ET DEBORDEMENT DU REMORDS A L'ADOLESCENCE : L'HISTOIRE DE LEILA

À partir de la conceptualisation de Bonnet et de l'histoire d'une adolescente de seize ans amenée à commettre un viol sur la personne d'une autre jeune fille, plusieurs idées peuvent être dégagée quant à la spécificité du remords à l'adolescence et quant à son incidence dans le déclenchement d'actes violents. Si le remords s'inscrit très tôt dans l'histoire du sujet, transmis à travers la filiation et repris par celui-ci en fonction de sa place dans l'ordre générationnel et de son propre vécu, l'adolescence le rendrait d'autant plus pesant que le sujet est pressé par son corps pubère de sortir des pactes fantasmatiques familiaux qui l'emprisonnent pour accéder à une identité génitale. Le remords à l'adolescence viendrait signer, pour l'adolescent, l'impossibilité de s'autoriser de son sexe et témoigner de l'enfermement de celui-ci dans une impasse entre l'identification primaire à la mère active et toute puissante et l'identification secondaire, œdipienne. Se heurtant à la nouveauté génitale, le remords pourrait conduire le sujet au passage à l'acte, ce moment fou de débordement du remords signant, de façon paradoxale, à la fois l'incapacité du sujet de s'engager sur la voie de l'accomplissement pubertaire et à la fois, son ultime tentative, vaine et désespérée, de redevenir sujet de son histoire. Et si cet acte s'avère un échec dans sa visée libératrice, peut-être pourra-t-il permettre au sujet, soutenu par le lien transférentiel, de reprendre la parole.

Mots clés Remords, Adolescence, Féminité, Viol.

#### JOCELYNE CHASTANG REMORDS ET RE-MORDS, D'UNE HOMONYMIE INQUIETANTE

Resituant le remords en lien avec la pulsion scopique et la castration maternelle, selon les travaux de Bonnet (Le remords. Psychanalyse d'un meurtrier), cet écrit tente de cerner l'évolution de cet affect, et notamment son intrication dans le processus de l'adolescence. L'hypothèse que le remords, en tant qu'angoisse d'effroi, peut sous certaines conditions, pousser à l'acte, sera développée, s'étayant sur le cas d'un patient ayant commis un meurtre immotivé en fin d'adolescence. Au travers de la reconstruction de l'enfance et de l'adolescence de ce patient, il s'agit de souligner comment la haine, les remords infantiles issus des relations

précoces mère-enfant ne seront contenus lors de la période adolescente que par des réponses autodestructrices, errances pathologiques, toxicomanie... Ces solutions invalidées par l'impasse pubertaire mèneront le sujet, " hanté " par les imagos maternelles, jusqu'à l'acte meurtrier.

Mots clés Remords, Matricide, Meurtre à l'adolescence, Pulsion scopique, Narcissisme

Rêves, songes, présages

Les rêves, songes et cauchemars ont inspiré de nombreuses productions culturelles (œuvres littéraires, picturales, contes). On leur accorde une place importante dans les récits mythologiques et les écrits religieux. Les rêves inspirent, font souffrir, protègent. Ce sont toutes les dimensions des rêves et des rêveurs que ce numéro de L'autre souhaite explorer.

Dan SCHURMANS L'interprétation transculturelle des rêves : possibilité, utilité, méthode

René DEVISCH Sentir et dire sa force vitale : le rêve et l'oracle médiumnique en milieu yaka (Accepté)

Au regard de la culture Yaka à Kinshasa et au Congo du Sud-Ouest, la force vitale d'un membre vivant ou décédé de la famille peut se manifester à d'autres membres dans le rêve et au devin médiumnique dans l'oracle divinatoire. La force vitale constitue une fonction liminale entre les passions et la réflexion, l'individu et les siens (les ascendants et les descendants), le somato-psychique et le socioculturel, l'être humain en tant que microcosme et les virtualités du macrocosme, la quête des « origines » (des objets originaires) et les métaphores politiques, sociales, professionnelles, religieuses fondatrices du milieu relationnel, de la profession, de l'investissement défensif, ou du traumatisme. La mort (l'existence dans l'outre-tombe), le sommeil, le rêve et l'oracle divinatoire sont apparentés comme des manifestations, sous des modalités humorales, de la force vitale au niveau du cœur et du foie. Tout comme la force vitale relie vivants et morts, les Yaka perçoivent le rêve et ses thèmes comme un mode bien réel et commun de communication et de gestion de l'insertion de l'individu dans le monde ainsi que le groupe et son histoire.

Ali AOUATTAH Le rêve. De la maladie à la guérison dans le maraboutisme marocain

Dans un grand nombre de sociétés, la valeur et la portée des rêves résident à la fois dans leur contenu et dans leurs usages sociaux. Dans le cadre du maraboutisme thérapeutique marocain, le rêve est utilisé par le patient, selon des modalités culturelles, en tant qu'élément essentiel du diagnostic, du traitement et de la guérison.

Danièle PIERRE Dieu qu'elle devait être seule. Histoire d'une brève rencontre entre deux mondes

L'auteur expose le cas clinique d'une jeune femme congolaise immigrée en Belgique. Envisagées comme autant d'élaborations secondaires des motifs inconscients, les accusations de sorcellerie permettent d'accéder – notamment dans les rêves – au cœur-même de la problématique œdipienne.

Corinne DELMAS L'invention d'une vie d'artiste J. Ruskin élargit la critique d'art à la critique sociale, toutes deux s'inscrivant dans la croyance en l'existence d'un ordre universel. Croiser l'analyse de l'œuvre et de l'auteur peut permettre de cerner comment cet auteur s'approprie la tradition romantique de la période précédente jusqu'à donner une consistance nouvelle à la figure de l'artiste romantique. Ruskin développe une théorie de la contemplation esthétique et de la créativité qui laisse une large place au concept de " génie " et cette figure de l'artiste idéal n'est pas sans présenter d'étranges analogies avec la personnalité de Ruskin qui est lui-même un " watcher ", un être dont toute la passion semble convertie en souci d'investigation, d'observation, et qui semble projeter dans sa vision de l'artiste sa propre situation de solitaire et son sens de l'exemplarité. Notre hypothèse est que l'œuvre, le travail intellectuel et d'écriture permettent à Ruskin, blessé narcissiquement et à l'identité problématique, de restaurer l'estime de soi. Nous interrogeons la manière dont s'articulent ici stratégie identitaire et estime de soi.

Hossein BENDAHMAN La langue et le corps comme marqueurs identitaires. Questions en vue d'une clinique de la double culture. A partir de l'interrogation sur la fonction paternelle, sur la langue et le corps comme marqueurs identitaires confrontés à l'épreuve de l'altérité dans le contexte de la migration , l'auteur défend l'idée que le langage structure la pulsion. Le projet est la restauration par l'écrit et/ou la cure d'une parole paternelle muette, la remise au monde par l'analyse dans une langue simultanée, celle de l'autre et la sienne. La langue est le recours d'une autre langue. Cet exposé illustre la thèse que le rapport à la langue structure le rapport au monde. La culture dépose dans la langue des éléments d'inclusion, notamment à travers noms et prénoms, qui se transmettent de génération en génération. Le prénom est souvent une représentation de la pulsion via la culture. Ce texte démontre aussi qu'il faut reconnaître que, pour les patients disposant d'une double culture, la langue minorée, voire refoulée, n'est pas sans commander des associations riches d'enseignement.

## SOINS INFIRMIERS

### no 5, 2003

Claudine Erni-Genton **Un lieu où l'on peut se réaliser pleinement**

Quelle satisfaction peut-on éprouver à travailler en EMS ? Ceux qui n'ont jamais fait l'expérience ignorent tout de la richesse, de la diversité et de la profondeur que l'on trouve en ces lieux.

Claire Miorini **Qui s'intéresse au rôle propre de l'infirmière ?**

Dans les soins à domicile - peut-être plus qu'ailleurs - le rôle infirmier n'est pas reconnu à sa juste valeur. Heureusement que le travail auprès des patients est gratifiant.

Françoise Taillens **A travers la lucarne des ethnologues**

Fascinant et bouillonnant, l'univers des soignants se dévoile dans toute sa richesse sous le regard ethnologique.

Brigitte Longerich **Chaque " moussaillon " compte**

Lors de leur dernière rencontre, les infirmières de salle d'opération ont misé sur l'équipe, une équipe gagnante.

Yvan Bourgeois, Christophe Jacques, Agnès Khelifa **Trois équipes mobiles sont en place**

Les soins palliatifs se développent à vive allure dans le canton de Vaud. De plus en plus, les équipes interviennent sur le lieu de vie du patient.

## SOINS INFIRMIERS no 6, 2003

Eliane Schenevey-Perroulaz **L'apprentissage de l'approche du corps, une réalité périlleuse**

Au cours de leur formation, les infirmières apprennent à dépasser leur gêne, leurs peurs et leur dégoût devant des visions parfois insoutenables.

Yves Dorogi **Comment gérer l'insoutenable ?**

Devant la souffrance immense de certains patients, les soignants se sentent démunis, dépassés. Ils ont alors besoin d'un support psychique professionnel.

Ruth Rapin et coll. **Prendre soin par le toucher-massage**

Les personnes âgées en institution apprécient la détente provoquée par le toucher-massage, de même que les possibilités relationnelles offertes par ce soin.

Brigitte Longerich **Chaque " moussaillon " compte**

Les infirmières de salle d'opération ont organisé leur dernière rencontre autour du thème de l'équipe gagnante.

Margrit Bachl **Les soins professionnels ne sont pas un luxe**

Une résolution a été adoptée par l'ASISP, mettant l'accent sur le rôle primordial des soins et leur accessibilité
