Welcome **International Association of Cancer Registries 35th Annual Meeting 2013**

The Instituto Nacional del Cáncer (INC) with the collaboration of the Bahía Blanca Cancer Registry and the International Association of Cancer Registries (IACR) would like to welcome you to Buenos Aires for the 35th annual meeting of the IACR.

Argentina has 13 population-based cancer registries with different levels of development and history and a national hospital-based cancer registry that centralizes data at the INC. The Bahía Blanca Cancer Registry was the first registry in the country. It was set up in 1989 and soon after became a Member of IACR.

The Instituto Nacional del Cáncer began its activities in September 2010, aiming at placing cancer in the government's agenda. The underlying idea is the coordination of public health measures and practices in the country at regional and national levels and the development and reinforcement of international bonds with similar institutions.

The Conference will emphasise the important role of cancer registries on the evaluation of cancer risks factors and quality of care. There will be two pre-conference workshops focusing on this: 'Trends – Incidence, Mortality and Estimations' and 'Measuring Inequities in Cancer Care'.

The venue for this conference is the city of Buenos Aires, a cosmopolitan city with a rich history, fascinating museums worth visiting and many other interesting places. Argentina is well known for her friendliness and appealing culture, ensuring you a pleasant stay.

Should our participants have some time to spare, Buenos Aires offers the possibility to travel to other tourist destinations like the Iguazú Falls, Patagonia or the Northern Mountains of Argentina as well as whale watching in Península Valdez.

Finally, we would like to thank the Scientific Committee and the Organizing Committee for their hard work and strong support in making this conference possible.

On behalf of the Organizing Committee, we are very glad to welcome you and hope to be able to assist you in every step of your visit in order to ensure a very pleasant experience.

Roberto Pradier
